SUMMARY

Java Backend Developer with 5 years of hands-on experience designing and developing scalable backend systems. Proficient in **Java**, **Spring Boot**, **Microservices**, **REST APIs**, and **cloud platforms**, delivering robust high-performance solutions. Experienced in **Agile methodologies**, performance optimization, and CI/CD practices.

SKILLS

- **Backend:** Java 8/17/21, Spring Boot, Microservices, REST APIs, JPA, Distributed Systems, Design Patterns, Spring AI, LLM Integration
- **Data Technologies:** Oracle, MySQL, IBM DB2, Kafka
- **Cloud & DevOps:** Google Cloud Platform (GCP), OpenShift Container Platform (OCP), Docker, Jenkins, GitLab CI/CD, Harness, JFrog Artifactory, Nexus Repository
- **Observability, Quality & Security:** Splunk, Dynatrace, AppDynamics, SonarQube, NexusIQ, Veracode
- **Testing:** JUnit, Mockito, Test-Driven Development (TDD)
- **Tools & Platforms:** Git, Maven, IntelliJ, GitHub Copilot, Postman, GitHub, GitLab, Jira, Confluence

WORK EXPERIENCE

Lloyds Banking Group

Hyderabad, India

Software Engineer II

Dec, 2023 - Present

- Scaled critical banking systems by decomposing a legacy monolith into 13 Spring Boot microservices (3-layer, SRP-driven), reducing tech debt and lowering error rates by 20% for 75k+ business users.
- Engineered a reusable JWT encryption/decryption library that standardized data security across 3 teams, ensuring compliance with SCA regulations and reducing integration efforts.
- Accelerated developer productivity by creating and open-sourcing a Spring Boot project generator; adopted by 10+ teams, reducing service scaffolding time from 2 hours to less than 15 minutes.
- Modernized payments infrastructure by leading upgrades to Java 17 + Spring Boot 3 and migrating 11 services to GCP-native architecture, processing ~1M daily transactions while lowering infra costs by 30%.
- Mentored and onboarded new engineers, driving knowledge transfer sessions and fostering best practices in microservice design.
- Recognized with the **Pinnacle Performer Award** for ownership and impact.

Infosys

Pune, India

Senior Systems Engineer

Apr, 2021 - Aug, 2023

- Contributed to design & development of 50+ Spring Boot microservices for an enterprise Liquidity product, enabling high-volume transactions for global banking clients.
- Owned end-to-end delivery of multiple mission-critical microservices — from requirements and system design to testing, integration, and production rollout — ensuring zero critical defects post-release.
- Built GitLab automation pipeline that deployed 60+ services across environments, reducing deployment time from 1 hr to 15 min and cutting ops effort by 75%.
- Orchestrated Failover/Switch and Disaster Recovery across 3 data centers, ensuring application continuity and minimal downtime during critical events.
- Migrated artifact management from Nexus to JFrog Artifactory, boosting release reliability and accelerating deployment cycles.
- Recognized with the **Insta Award (2023)** for driving automation and delivery excellence.

PROJECTS

OceanResume

- **Technologies** - Java, Spring Boot, Spring AI, Gemini 2.0 Flash, React, Tailwind CSS, Oracle Cloud Infrastructure
- **Live Project** - <https://oceanresume.oceanbytes.in>
- Developed an **AI-powered resume generator** that transforms user prompts into ATS-optimized, professionally styled resumes within minutes.
- **Adopted by 100+ users**, demonstrating real-world reliability and production readiness.

EDUCATION

Maharana Pratap College of Technology

Gwalior, India

Bachelor of Engineering (CSE) | GPA: 7.73/10

2016 - 2020
